## General Interest Audio Cassette Tapes

### LOTR - BBC Radio Audio \$35

Each of the original 26 episodes received two broadcasts per week - standard practice for many BBC radio serials even today. The first broadcast of Episode 2 was blacked out across a large part of south east England because of a transmitter failure (a very rare occurrence even then). The 26-part series was subsequently edited into 13 hour-long episodes, restoring some dialogue originally cut for timing (since each hour-long episode is actually around 57 minutes, as opposed to 54 minutes for two half-hour episodes), rearranging some scenes for dramatic impact and adding linking narration and music cues. It was broadcast in 13 episodes in 1982. The re-edited version was released on both cassette tape and CD sets which also included the soundtrack album (noticeably taken from a vinyl copy). A soundtrack album featuring a completely re-recorded and in some cases expanded, suite of Stephen Oliver's music was released in 1981. 737 minutes
